PROFILE

Accomplished safety professional with over 10 years in rail and 2+ years in electrical HV/LV industries seeking a career path in IT. Proven expertise in leading health and safety initiatives, implementing robust Health and Safety management systems, and achieving compliance with ISO 9001, 14001, and 45001 standards. Passionate about leveraging technology and innovative strategies to enhance client experience and drive operational excellence. Currently pursuing an MSc Computer Science with Artificial Intelligence to effectively integrate emerging technologies.

WORK EXPERIENCE

HSQE Manager

RJ Power, London

Aug 2022 – Present

- Spearheaded safety initiatives across high-profile sites, including Tower Bridge and the Science Museum.
- Championed a transition to "Observation Reporting," increasing reporting by 50% in the first month.
- Led accreditation for ISO 9001, 14001, and 45001 standards.
- Consulted with directors, project managers, and staff to enhance site inspection criteria.

HSE Advisor

1st In Rail, London

Nov 2020 – Aug 2022

- Conducted site inspections and incident investigations across the London Underground Network.
- Improved "Close Call" reporting by 15% and increased inspections by 50%.
- Delivered impactful safety briefings and maintained compliance documentation.

Data Engineer

Gamma Systems, London

Aug 2019 – Nov 2020

- 1st and 2nd fix of telecoms and security systems, including IRS, CCTV, Door Access and Access Control.
- Fault finding, including toning out cables, testing current and network compatibility.
- Pre-configuring and connecting system components as a pre-built package to install on site.

ADDITIONAL INFORMATION

- Electric guitarist and aspiring music producer.
- Supported charitable initiatives including fundraising for ForAfrika, Metro Ministries, and Compassion UK.
- Organised a charity boxing event to raise funds for community campaigns.
